

## Course Descriptions

### **Introduction to Industrial Technology**

**Required: Class for students that are interested in the Construction Trades & Cabinet/Furniture pathways.**

Students will take safety tests over the machines that they will use in the pathway. Students will be given simple tasks giving them an introduction into what they will encounter in the pathways. The first three weeks of the class will deal with safety process and the proper use of the equipment. The next two weeks will deal with the students getting a chance to use the equipment to build a small project. The project will be a choice of a few certain projects that the instructor will have plans for. The students will be required to pay for their project. Students will be required to pay for the OSHA 10 hour general safety test. That cost is 18 dollars.
